

# CLINICAL TRAINING IN THE LIDCOMBE PROGRAM: A BEHAVIOURAL INTERVENTION FOR STUTTERING IN PRE-SCHOOL AGED CHILDREN

## NOV 21 – 22, 2019, TORONTO

Hosted by:  
**Monarch House**

### ABOUT THE LIDCOMBE PROGRAM

The Lidcombe Program is a behavioural intervention developed by Mark Onslow and his colleagues at the Australian Stuttering Research Centre, to treat stuttering in preschool aged children.

After training, speech-language pathologists will be prepared to teach parents to administer appropriate feedback about fluency and stuttering to their children in every-day speaking environments and to monitor treatment goals and progress.

Studies have shown that this is an efficacious and effective evidence-based treatment for stuttering. The Lidcombe Program has been adjusted for school-age children and special populations.

### MEMBERS OF THE LPTC

#### Canada:

Rosalee C. Shenker, Ph.D., CCC-SLP

Christina Lattermann, Ph.D.

Carla DiDomenicantonio, M.HSc.

#### United States:

Melissa Bruce, M.Sc. CCC-SLP
